FOUNDRY MATERIALS · SPECIFICATION LEDGER

MATERIAL CHOICE FOLLOWS QUANTITY, ACCURACY, AND SERVICE

MATERIAL	PROPERTIES AND USE
Wood	Easy to work and economical for small quantities, but affected by moisture, abrasion, and warping.
Metal	Accurate, strong, and durable for machine moulding and high production; common choices include cast iron, steel, brass, and aluminium.
Plastics and rubbers	Light, smooth, moisture-resistant, and useful for intricate or repeat work.
Plaster and wax	Useful for patterns, core boxes, and investment casting applications.

Made with GAMMA

SHOP STANDARDS · VISUAL MARKINGS

PATTERN COLOUR CODES MAKE SHOP-FLOOR FEATURES VISIBLE

Wooden patterns are treated with shellac, while important surfaces and features are coloured for quick identification.

Black	Surfaces left unfinished.
Red	Surfaces to be machined.
Red stripes on yellow	Seats for loose pieces.
Yellow	Coreprints.
Black diagonal stripes on yellow	Stop-offs.
